

InterLend Online Lending

Member-Focused Convenience

Credit union members are guided through a loan application process designed to be as painless as possible. Time-saving features, such as auto pre-fill of basic information, allow members to get back to their lives more quickly. Member-friendly navigation keeps the process simple. 24/7 availability means that members can apply for a loan when it is convenient for them.

As a further convenience, if the loan is not automatically approved, your member can return to the site at any time to check on the status of the loan. In addition, members can now upload their loan verification documents as part of the online application process, cutting out the extra steps of faxing, emailing or hand-delivering them to the credit union.

A Menu of Options

Our clean menu-style product presentation along with “Did you know?” facts are designed to educate your member about loan protection products. Your members are empowered to make educated decisions while also protecting your credit union.

Security Enhanced

Keeping your members as secure as possible online is of utmost importance. InterLend employs encrypted messaging, firewall and multi-factor authentication technology to help deter fraudulent activity.

Plays Well with Others

Unlike many other systems, our online solutions integrate with your LOS or data processor to provide the most seamless member experience possible.

Have It Your Way

We understand that no two credit unions are exactly the same. That is why we customize our online solutions based on your credit union. Everything from loan types to approval criteria and disclosures to the colors of the application are specific to you. We even include space for you to announce special CU promotions to your members.

Docs on the Go

When integrated with our CRITERION Loan Origination System, our eSignature feature will allow loan documents to be accessed directly by your members. They can review their loan paperwork and sign online when it's convenient for them, even at 2 AM.

Coming Soon

Online Account Opening

Now new members will be able to join your credit union from the comfort of their homes or their favorite hot spot. All it will take is an internet connection and a few minutes to go from CU outsider to CU member. This will be especially useful to credit unions who want to grow their membership base among tech-savvy demographics.
